

DOTTORATO DI RICERCA
IN SCIENZE DELLA TERRA

Mercoledì 14 Febbraio 2018 – ore 9:30
Aula Lucchesi

DISCUSSIONE TESI DOTTORATO

SSD: GEO 04/05

XXX CICLO

Matteo Fiorucci

Approaches of data analysis from multi-parametric monitoring systems for landslide risk management

Roberto Iannucci

Passive seismic investigations for landslide hazard study in rock masses

Gian Marco Marmoni

Multiphysical modelling for thermo-mechanical behaviour of rock masses in slope scale gravitational dynamics

Serena Moretto

Potential of satellite sar interferometry for large landslide prediction: assessment and optimization of landslide forecasting methods
